

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

## Mathematical Philosophy

*A STUDY  
OF FATE AND  
FREEDOM*

By CASSIUS J. KEYSER, Ph.D., LL.D.

Adrain Professor of Mathematics in Columbia University

THESE "Lectures for Educated Laymen" aim at democratizing science and scientific criticism. They show that the *greatest* of mathematical ideas—the pillar-concepts of the science—belong no more to mathematics than to *all* science and to rational thought in general. The great pillar-concepts are explained in the simplest terms. The reader need not be a mathematical specialist. These lectures are not addressed primarily to mathematical technicians. They are designed for students and teachers whether of mathematics, or philosophy, or engineering, or psychology, or logic, or education, or sociology, or art, or natural science, and for all other students, thinkers, and critics who own allegiance to the *laws of thought* and who desire to gain a fair understanding of the nature, the spirit, the standards, and the bearings of the science which Plato called divine. Price \$4.70.
